Mr. Jack Whitsett
Deputy County Counsel
County of Los Angeles

Dear Mr. Whitsett:

APPLICATION OF BUILDING LAWS TO FLOOD CONTROL DISTRICT PROJECTS

This is written as a confirmation of your decision conveyed in a recent telephone conversation with Mr. Eugene Zeller of our staff pertaining to the application of the Los Angeles County Building Laws to the construction of a pump house by the Los Angeles County Flood Control District.

The specific project is described as a structure that houses three gas powered and two electric powered pumps used to transmit flood waters from a storm drain to the Los Angeles River. In addition to the electrical, plumbing and mechanical facilities attendant to the water transmission equipment, the building also houses rest room accommodations and a small office area.

It is understood that the project is exempt from the regulations set forth in the Los Angeles County Building Laws under the provisions of Section 51091 of the Government Code relating to exemptions for facilities used for the transmission of water. The exempted construction includes all building, grading, electrical, mechanical and plumbing facilities except the sewer connection to the public sewer. It is further understood that your advice is based upon an opinion previously rendered by Mr. R. L. Landes, Deputy County Counsel, serving the Los Angeles County Flood Control District.

This decision will be the basis for our exempting this project and all other flood control projects involved in the production, storage or transmission of water.

Please contact Mr. Eugene J. Zeller at 974-7149 if this, in any way, does not accurately establish your advice in this matter.

Very truly yours,

James T. Rostron
CHIEF DEPUTY

Original Signed

John E. Maulding
Superintendent of Building
